OCE-M80- 253

2 5 AUG 1980

MEMORANDUM FOR: Deputy Director of Data Processing

25X1A

PROM:

Chief, Engineering Division, OC

SUBJECT:

OC/ODP Personnel Rotation Program (U)

1. As we recently discussed, an exchange of OC and ODP personnel would be beneficial to both offices and to the individuals involved. The understanding of office methods and procedures and the exchange of possible problem solutions that would result from such a program could do much to further both of our organizations toward their common goals. (U)

2. To facilitate assignment of appropriate individuals, I suggest that, unlike existing rotational assignees, the individuals continue to be slotted against positions in their parent organizations. Career development and promotions will be managed by their parent organization, while the organization of assignment will provide day-to-day tasking and supervision, as well as performance appraisals. (U)

as our first candidate for the OC/ODP personnel rotation. Currently, is the team leader for the development of AFT-II, a system which is successfully being placed in operation in several locations. Pending finalization of the installation schedules, will be available for a two (2) year tour with ODP in this rotation program approximately November 1980.

also recognizes the importance of this program and is anxious to meet with you and your staff. (C) A9c5.2

4. We are presently reviewing our current work load in order to identify the type of tasks that would be appropriate for an ODP careerist to perform on assignment to OC. Tentatively, the assignment would be to develop significant enhancements for mini-computer systems, specifically the Interdata based AFT-II system or the DEC based ARS system. Other assignments which are being considered are: software development for micro-computer based systems, analysis and development of data reduction software for computer performance evaluation efforts, and analysis and design in support of major new initiatives. The specific assignment will be influenced by the individual's background and desires. (U)
